

## Quality Assurance Testing

**Managing product quality – along with cost and schedule – is one of the most important challenges companies are facing today. The growing complexity of underlying domains, multitudes of platforms to be supported, and ever reducing release cycles are making the quality assurance challenge even more complicated.**

GENESIS provides Quality Assurance Testing resources with experience using HP Quality Center and Quick Test Professional (QTP). Our resources perform both automated and manual testing. Many have experience with the Mercury suite of QA tools as well as SilkTest and Selenium.

### Results

- ◆ Reduced Costs - Genesis delivers a 25% savings in the SDLC by driving testing early in the cycle and putting repeatable processes and regression testing in place
- ◆ Increased Effectiveness - Increased effectiveness through QA process improvements, automation, and metrics!
- ◆ Reduced Risks - System down-time and application errors which could result in millions in lost revenue are mitigated through structured testing practices.

### Why Use Quality Assurance Practices?

- ◆ Improved reliability of all applications
- ◆ Increased customer satisfaction through delivery of the right business functionality
- ◆ Enhanced maintainability of your mission critical applications

### Genesis Micro Solutions Differentiators

Genesis delivers high-quality and cost-effective quality assurance solution to support testing needs enable our clients to focus on strategic business initiatives through:

Repeatable QA Process and Artifact Improvements  
Leveraged Variable QA Staffing Team (Onshore / Offshore)

Detailed Dashboard and Metrics

Minimize costs by staffing flexible resources to address project needs

Root Cause Analysis for Cost and Defect Savings
